

# SCHOOLBOX + TASS

**Now more than ever, today's leading schools need technology and platforms that seamlessly integrate,** yet achieving a consistent flow of data between your TASS School Management System, LMS and school portal can be difficult.

**This market-leading integration consolidates your TASS SIS data,** centralises it to preserve its data integrity, improves the user experience, and helps your school gain competitive advantage over the rest.

This stable integration, which has been in development since 2013, **ensures a seamless flow of data between your school's core platforms.**

**The Schoolbox + TASS integration allows you to connect your whole school with a single-sign-on (SSO),** automatic authentication into all of TASS' portals, including the Teacher Kiosk, Parent Lounge, and Student Cafe.

# CURRENT CAPABILITIES

## SCHOOLBOX + TASS—CURRENT CAPABILITIES

**This integration reads data in real time from TASS** and builds a better user experience in Schoolbox. This means you can **view SIS data, such as staff and student information, parent contacts, class enrolment, timetables, and much more, right within Schoolbox**—creating a one-stop-shop for all the teaching and learning information your school needs.

We don't replicate or duplicate the data from TASS, we read it directly from TASS in real time from Schoolbox. We understand that every school is unique, which is why we've put lots of time and energy into building this integration, to answer all of the common and unusual challenges faced by K-12 schools around the world.

WHAT'S INCLUDED?

## **All student, parent and staff information**

Student, parent, and staff details are all synced from TASS into Schoolbox, so you can easily locate any information you need from the easy-to-navigate Schoolbox dashboard.

SCHOOLBOX + TASS—WHAT'S INCLUDED?

## Timetable and class enrolments

Teachers can see how many and which students are enrolled in their classes, so that they can easily plan for the year ahead.

Likewise, students can easily see their classes when they log in to their student portal as it's updated throughout the year.

**It's also easy to mark attendance through Schoolbox.** By enabling attendance support and SSO in your administration settings, a deep link to the attendance roll is added to the daily timetable on the Schoolbox dashboard. This link takes you directly to the Teacher Kiosk feature in TASS, where you can mark attendance. Easy!

### Timetable for Mr Jack Coles

	Day 1	Day 2	Day 3
<b>Period 1</b> 9:00am–9:20am	9A French (9FRENCHA) 105	12A English (12ENGLISHA) 202	
<b>Period 2</b> 9:50am–10:40am	9A French (9FRENCHA) 105	12A English (12ENGLISHA) 202	9A English (9ENGA) 101
<b>Period 3</b> 11:00am–11:50am	Demo Class 2 (DEMO2) 204	9A French (9FRENCHA) 105	12A English (12ENGLISHA) 202
<b>Period 4</b> 11:50am–12:40pm	9A English (9ENGA) 101	9A French (9FRENCHA) 105	12A English (12ENGLISHA) 202
<b>Period 5</b> 1:50pm–2:40pm	12A English (12ENGLISHA) 202	Demo Class 2 (DEMO2) 204	9A French (9FRENCHA) 105
<b>Period 6</b> 2:40pm–7:30pm	12A English (12ENGLISHA) 202		9A French (9FRENCHA) 105

## Communication rules

These can be easily configured in TASS and will define who should see information relating to a particular student. It also defines points of contact for teachers, such as parents or guardians.

This means that things like some student information and other important flags are shared through the appropriate channels.

## Single sign on into TASS portals

Too many logins and separate systems are headaches your school can avoid. Our SSO functionality means you never have to log in to multiple systems again, saving you time and your sanity!

# HOW IT WORKS

Our deep integration with TASS means that **Schoolbox receives core information from the SIS, in real time**, and complements that existing core data by translating it for teaching and learning management, communication, and so much more.

## SCHOOLBOX + TASS—*HOW IT WORKS*

Core student information, such as **parent relationships and emergency contacts** are **fed into Schoolbox from TASS**, and are all presented on the easy-to-follow Schoolbox dashboard.

A fully-supported API is also being implemented, which will provide both products the opportunity to address additional workflow improvements, including the ability to write back school data, such as the Markbook, Pastoral Care and student wellbeing. We will continue improving our TASS integration with time, with more functionalities to be introduced in future Schoolbox roadmaps.

# THE BENEFITS

Our real-time integration ensures a **seamless user experience with all student, staff and parent information** available at your fingertips—it works great with our eduAPP!

*SCHOOLBOX + TASS—THE BENEFITS*

**Teachers can simply log in once and access all of the necessary learning and teaching functionalities straight within Schoolbox or through deep linking, which takes you directly to the appropriate TASS portal.**

**Schoolbox is the single destination for TASS schools;** teachers can simply click a link from the side or top menu and be taken to where they need to be. Find out why more and more leading TASS schools are adopting Schoolbox, Australia's #1 K-12 LMS and school community portal.
